

# INTERIM ROUTINE INSPECTIONS

## TO SUPPORT ELECTRICAL SAFETY

Working only to maximum periods between inspections can mean electrical installations are left unchecked for up to five years in non-domestic buildings. Instead, our Interim Routine Inspections service gives Duty Holders the option to go above and beyond compliance, for enhanced safety, reduced downtime and complete peace of mind.

We've brought together our most requested routine inspections into one seamless bundle – delivering annual checks of safety, condition and compliance for complete peace of mind across electrical installations.
